Subject: Amended request for sequence search for 09/806,088

Hello Ms. Toby,

This is in response to your phone call on Friday. I have now amended my sequence search request. Accordingly, instead of searching the full length of SEQ ID NO:1, please search the portions of SEQ ID NO:1 requested below. Thus the total number of nucleotides of SEQ ID NO:1 add up to 1501. Hopefully this should fit into the required time limitations. If there are still any problems please let me know.

Thanks
Manjunath
